7pm - 9pm

NIGHT
WORLD FORUM | 15th EDITION
ZERO EXCLUSION CARBON POVERTY

05 Septembre 2023
Night followed by a cocktail reception

WHEN ENTREPRENEURS AND YOUNG PEOPLE ARE CHANGING THEIR WORLDS!

Is changing the world (still) possible?

Some of us dream of it, others no longer believe it. How about proving that it can be done? What if the first step towards changing the world was to change our own?

Come and meet the entrepreneurs and young people who, from Tunis to Manila, are working together to find solutions to their own challenges.

To round off the night, join us for a convivial cocktail from 9pm!

FIND THE DETAILED PROGRAMME ONLINE

WITH THE SUPPORT OF

Acted is an international NGO that helps 18 million people in 42 countries through more than 500 humanitarian, development and environmental projects. Acted relies on a network of local and global partners and a detailed knowledge of the territories, as well as on a multidisciplinary approach adapted to each context to contribute to a world of "Zero Exclusion, Zero Carbon, Zero Poverty".

A capital with an international reputation, Paris is committed to the ecological transition and social justice. Through solidarity actions and cooperation projects, Paris consolidates and enriches its exchanges with the rest of the world to promote its ambitious transformation policy towards a fairer, more sober city that preserves nature and biodiversity, and adapted to climate change.

Since its creation in 1960, Macif has been a committed citizen insurance company, whose economic project primarily serves the human project. A multi-business insurance company with mutualist values, it brings together nearly 5.7 million member-clients who pool their risks to protect what is essential to everyone: their lives, their loved ones, their property. With no profit or shareholders to remunerate, Macif reinvests part of its results to carry out actions for the benefit of its members in the common interest.

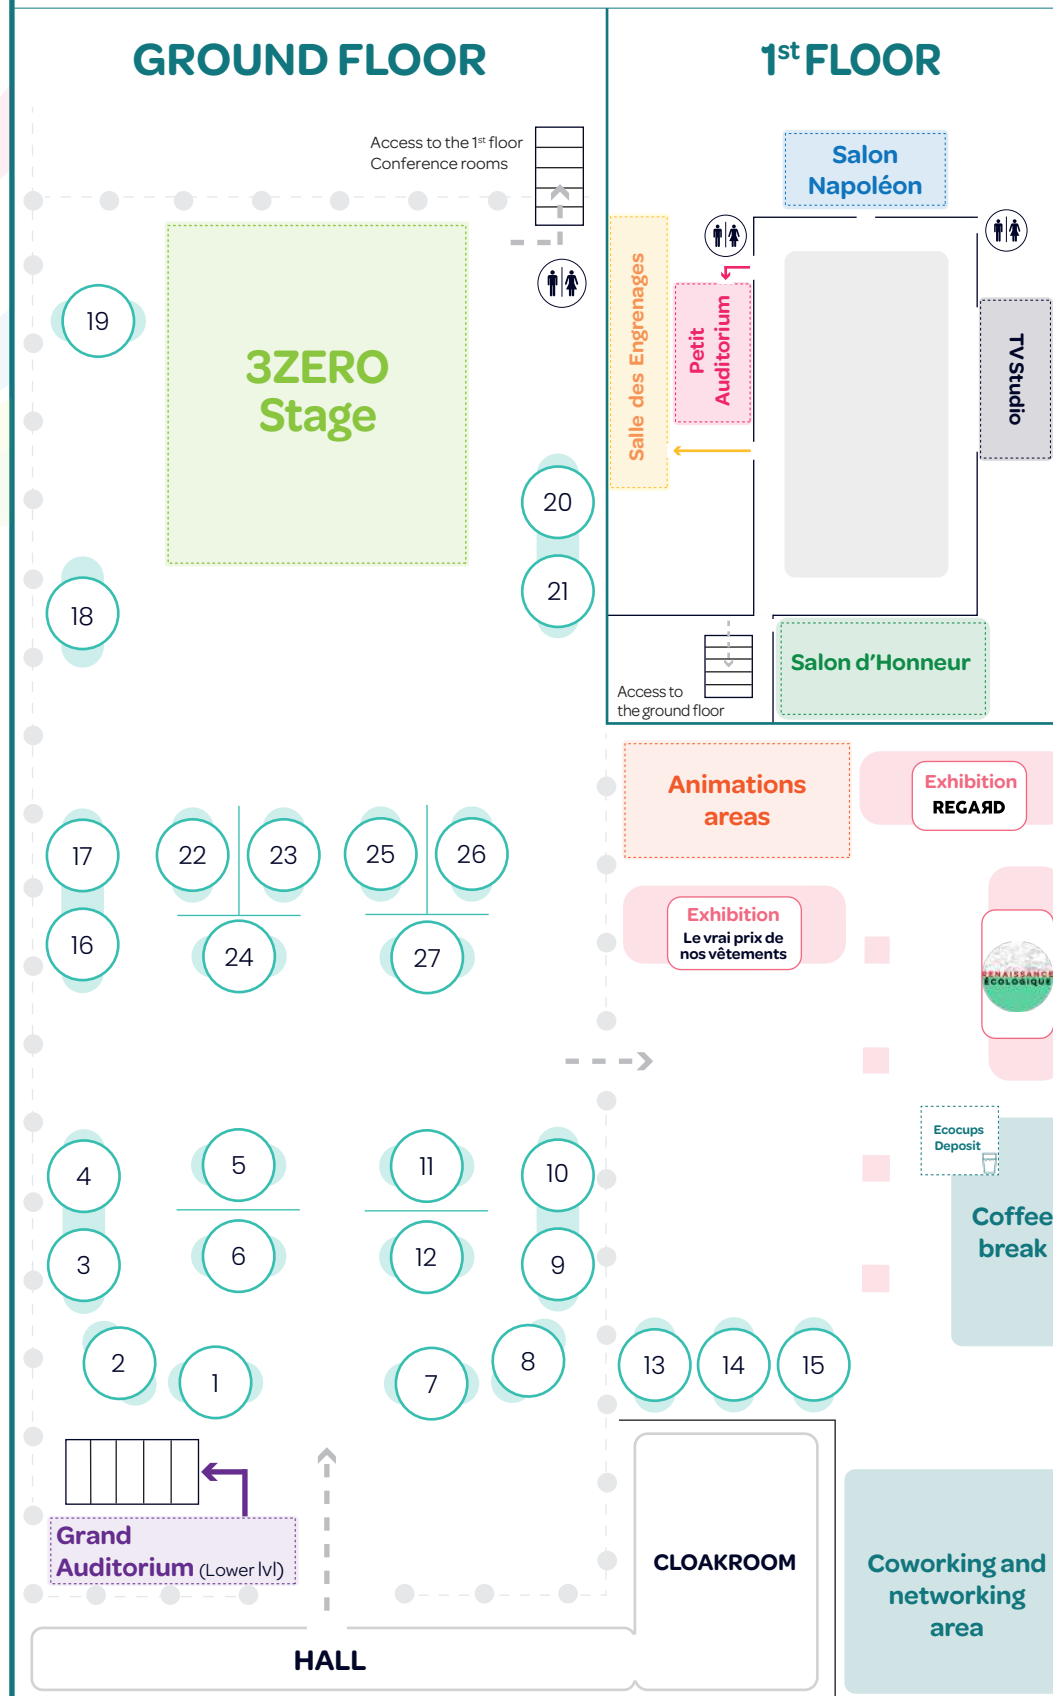

The Directorate General for Globalisation of the Ministry of Europe and Foreign Affairs, in liaison with the administrations involved and in partnership with all the international organisations and players concerned, defines and implements France's action in relation to global issues, sustainable development, solidarity investments, the policy of influence and major sectoral policies, particularly within the framework of the multilateral bodies falling within its areas of competence.

The Orange Group is present in 26 countries with 288 million customers. Its strategic plan, "Lead The Future", sets ambitious social and environmental responsibility goals that reflect the company's raison d'être, core business and commitments.
